DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 – 3, 9 – 34, 37 – 43, 47 - 49, drawn to a device, classified in class 257, subclass 94.
 - II. Claims 4 – 8, 35 – 36, 44 – 46, 50, drawn to a method, classified in class 438, subclass 39.
 - III. Claims 51 - 63, drawn to a device, classified in class 372, subclass 44.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case instead of forming a multilayer ridge it would be possible to form a multilayer planar structure and the etch to form a ridge.
3. Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as

Art Unit: 2814

claimed because the combination does not require multilayers. The subcombination has separate utility such as a restive structure.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Hal Yeager on 7 August 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas A Wille whose telephone number is (703) 308-4949. The examiner can normally be reached on M-F (6:15-3:45).
